

CARPENTRY

INTRODUCTION:

The term carpentry is used with wood working. Wood works such as making wooden partition, roofing, flooring etc. are carpentry works. The term joinery is used with making of doors, windows, wooden frames, etc. Teak wood, Sal wood, Mango wood, Deodar wood, Haldu wood, etc. are the commonly used woods in carpentry works.

SAFETY MEASURES:

GENERAL SAFETY RULES:

- (1) Pay close attention to what is being done.
- (2) Move carefully when working or climbing.
- (3) Keep the workshop place neat and tidy.
- (4) Sharpen or replace dull tools.
- (5) Disconnect power tools before adjusting them.
- (6) Keep power tools guard in place.
- (7) Avoid interrupting another person who is using a power tool.

PERSONAL SAFETY:

To avoid injury on our body we should use safety devices.

SAFETY CLOTHING:

Loose clothing such as pullovers and ties can cause serious accidents. We should remove our jackets, tuck in the tie and wear an apron. Girls and boys along with hair should tie it back or wear a cap.

In cold or even cool weather gloves may be used for the protection of fingers. Gloves protect hands from splinter and rough materials. Light weight type gloves are best for carpentry work.

SAFETY SHOE OR BOOT:

For safety foot, individual safety shoe or boot with safety toes and steel soles must be used.

WORKSHOP DISCIPLINE AND SAFETY:

- (1) Avoid talking to others when working.
- (2) Do not come to the workshop in the state of intoxication.
- (3) Workshop must be kept neat and clean.
