

Sessional Examination II

B.Tech 2nd Semester (CE)

Course : Chemistry (BCH23111T)

Total Marks – 30

Time – 1 h

- ✓ 1. Determine the gross and net calorific values of a coal sample containing 84%C, 1.5%S, 0.6% N, 5.5%H and 8.4% O. (6)
- ✓ 2. Distinguish between gross and net calorific value of a fuel. (3)
- ✓ 3. List any two characteristics of a good fuel. (1)
4. Write the principles of Green Chemistry and explain. (6)
5. Discuss on Biodiesel production from renewable feedstock. (4)
- ✓ 6. Write the Schrodinger Equation and explain the terms involved. (4)
- ✓ 7. What is Ψ ? What are the significance of Ψ and Ψ^2 . (4)
- ✓ 8. Mention the significance of radial and angular wave functions. (4)
