

UHV NOTES (2024)

Value: Value means to be of worth. Basically, they are the standard or the basis of which we evaluate something and make judgment about how desirable or undesirable that thing is to us. That thing can be an idea, a place, a person, an object, or any event.

Types of Values:

1. **Personal Value**
2. **Civic Value**
3. **Religious Value**
4. **National Value**
5. **Spiritual Value** - Relative Value
6. **Social Value**
7. **Human Value** - Absolute Value

Examples

1. **Personal Value:** Health, freedom, happiness, music, career, coding
2. **Civic Value:** Cleanliness,
3. **Religious Value:** God
4. **National Value:** Justice, Patriotism
5. **Spiritual Value:** Faith, Hope, Purpose of life
6. **Social Value:** Family, Friendship, trust

What is value education?

Character oriented education that instills basic values and ethnic values in an individual is called value based education. The subject that enables us to understand what is valuable for human happiness is called value education.

Why there is a need of Value Education?

Value education is important to help everyone in improving the value system that he/she owns and put it to use. Once one has understood his or her values in life, he or she can examine and control the various choices he or she makes in his or her life.

How does value education help in fulfilling aspirations?

Value education enables us to understand our needs and visualize our goals correctly and also helps to remove our confusions and contradictions and enable us to rightly utilize the technological innovation. Values form the basis for all our thoughts, behavior, and action. Once we know what is valuable to us, these values become the basis for our action. We also need to understand the universality of values

human values. Then only we can get common program and can be assured of happy and harmonious human society.

What the basic guidelines for value education?

The guidelines of value education are:

1. Universal: It means to be applicable to all the human being irrespective of caste, nationality, religion, etc. for all times and region.
2. Rational: It has to appeal to human reasoning and not based on dogmas or blind beliefs.
3. Natural and Verifiable: It has to be naturally acceptable to the human being who goes through the course and when we leave on the basis of such values.
4. All Encompassing: Value education is aimed and transforming our consciousness and living and hence it needs to cover all the dimensions (Thought, behavior, work and realization) and levels (Individual, family, society, nature and existence) of human life & profession.
5. Leading to Harmony: As value education is aimed at promoting harmony within the individual among human beings and nature.

What do you understand by a value of an entity? What is the value of a human being?

In the value of any entity, what exists is its participation in the larger order of which it is part. For example, value of a pen is that it can write. Here, the pen is a participant in the bigger order where pen, paper, human being all are present.

The value of a human being is the participation of himself/herself at different levels in the following manner.

1. Behavior
2. Work

The participation of human being for trying to give happiness to human being as team is behavior as the main values are mainly trust, respect, affection, care, relationship, reference, glory, gratification & love.

Here, the values with material things are utility values & artistic values.

All these values are nothing but participation of human beings in different dimensions of being.

What is the need for value education in technical and other professional institutions?

Ans: The subject that enables us to understand what is valuable for human happiness is called value education. The need for value education in technical and other professional institutions is:

1. Complementing of values & skills: To fulfill our aspiration both values & skills are necessary when we identify and save the right goals and produce in right direction. It is known as value domain, the domain when we learn the practices to actualize this goal to develop the techniques to make this

happen in real life in various dimensions of human endeavor is known as domain of skill. Hence, here is an essential complementing blue values and the skills for the success of the human endeavour.

2. Technology & human values: The present education system has become largely skilled based. The prime & emphasis is on science & technology. However, science & technology can only help to provide the means to achieve what is considered as valuable.

It is not within the scope of science & technology to provide the competence of deciding what really is valuable.

Value education is a crucial missing link in the present education system.

Write a short note on the need for value education in today's scenario.

Ans:

1. Human & Technology
2. Need for value education - correct aspiration & our aspiration. Value education enables us to understand our needs & visualize our goals correctly and also indicate the direction for their fulfillment. It also helps to remove our confusion and contradiction & bring harmony in all levels.
3. Understanding universal values to fulfill our aspiration in continuity. Values form the basis for all our thoughts, behaviors, & actions. Once we know what is valuable to us, these values become the basis for our actions.
4. We also need to understand the universality of various human aspects because only then we can have a definite & common program for value education.
5. Evaluation of our self belief: Each one of us believes in certain things, and we base our values on this belief, which may or may not include interest in reality. These beliefs come to us from various sources like what we read, see, hear, from others.

The value education helps us to evaluate our beliefs & assume values.

What is self exploration ?

- It is a process of dialogue b/w 'what I am' and 'what I really want to be'.
- It is a process of self evaluation through self investigation
- It is a process of knowing oneself and through their entire existence
- It is a process of being in harmony in oneself and in harmony with entire existence.

Define self exploration, what is the content of self exploration?

Self exploration is the process to find out what is valuable to me by investigating within myself what is right for me, true for me, has to be judged within myself.

Through self exploration we get the value to ourselves. The content of self exploration is just finding answers to the following fundamental questions to all human beings.

1. The goal or desire
2. Program

What is the purpose of self exploration?

1. It is a process of dialogue b/w what you are & what you really want to be.

It is a process of focusing attention on ourselves, our present beliefs & aspirations, and what we really want to be.

If these two are the same, then there is no problem.

If on investigation we find that these two are not the same, it means we are living with this contradiction and hence we need to resolve this conflict within us.

2. It is a process of self-evaluation. Through self visualization we successively evaluate ourselves by bridging the gap b/w what we are and what to be. Hence the self exploration needs our own improvement, our self evaluation.

3. It is a process of knowing one-self and through that knowing the entire existence.

The exploration starts by asking simple questions about ourselves which gives our clarity about our being to the about everything around us.

4. It is a process of being in harmony in one-self & harmony with entire existence. The process of self exploration helps us to be in harmony and with everything around.

What do you mean by natural acceptance & Experiential validation?

Ans: Natural acceptance

- Natural acceptance is a process of self exploration. Self exploration is a method to explore oneself.
- Natural acceptance is a process to understand self first. It implies unconditional and total acceptance of self, people & environment. It also refers to the absence of any exceptions from others.

Experiential Validation

- Experiential Validation is a process that infuses direct experience with the learning process & it may be regarded as a philosophy & methodology in which the individual experiences & focused reflection of the experienced helps to increase knowledge, develop skills & define values.
- When what we already believe to be true of us is validated by some situations, phenomenon or authority, it is termed as experienced validation.

What do you mean by your natural acceptance. Is it innate, invariant, universal? Explain.

Natural acceptance is a way to accept the good things naturally, learn everything that is good from others but bring it in our own way

Natural acceptance does not change with time. It remains invariant with time. Ex: change with age. Acceptance for trust & respect does not change with age.

It does not depend on the place where we have accepted in our life at any time of our age. It does not change, even if we move from one place to another place.

Natural Acceptance is same for all of us. It is common for every human being. Though each one has different likes & dislikes & means to live & to read etc, if we go deep in our mind, the purpose of our words, behaviors & efforts etc are based on common goals like the need to be happy, need to be respected, need to get prosperity. So, our basic acceptance remains universal.

Happiness and Prosperity

1. What is happiness?

Happiness may be defined as being in harmony, synergy, in the state or situation that we like.

The state of liking is happiness.

Happiness is a state of mind or feeling characterized by contentment, love, satisfaction, pleasure & joy. It may be described as consisting of positive emotions & positive activities.

2. What is the meaning of prosperity? How does it differ from possession of wealth? Differentiate b/w prosperity & wealth with examples.

Prosperity is a feeling of having more than required physical facilities. Wealth is a physical thing. It means having money or having a lot of physical facilities or both.

There is a very important distinction. We keep working for wealth without realizing the basic desire is for the feeling of prosperity. To have a feeling of having enough.

Prosperity is more acceptable to us because wealth is just a part of prosperity. We are trying to achieve happiness & prosperity by maximizing the stock, accumulation & consumption of physical facility. It is becoming anti-ecological and anti-people & threatening human survival.

Activities in Self, Body, and Mind

1. Activities Going On in Self

- **Nature:** Internal, mental, abstract.
- **Examples:** Thinking, feeling, dreaming, imagining, meditating, introspecting.
- **Qualitative Difference:** Primarily subjective, driven by internal thoughts and emotions.

2. Activities Going On in Both Body and Self

- **Nature:** Intertwined, both physical and mental involvement.
- **Examples:** Speaking, writing, playing music, dancing, painting, mindful movement.

- **Qualitative Difference:** Requires coordination between mind and body. Often involves creativity and expression.

3. Activities Going On in Body with Consent of Self

- **Nature:** Primarily physical, with conscious awareness.
- **Examples:** Walking, running, eating, sleeping, exercise, yoga.
- **Qualitative Difference:** Actions taken consciously with awareness and acceptance. May involve self-care and bodily awareness practices.

Key Points:

- **Self:** Refers to the inner world of thoughts, emotions, and consciousness.
- **Body:** Refers to the physical body and its functions.
- **Consent:** Indicates conscious and voluntary participation from the self.

How do you presently decide what is valuable to you? How do you ensure that your decision is right?

Determining what is valuable to me involves a blend of personal reflection, examining long-term goals and aligning actions with core principles.

Personal reflection: I reflect on what truly matters for me. This could include happiness, growth, relationships or achievements.

Alignment with goals: I look at my long-term goals and see how potential values align with these objectives.

Core principles: I consider my core principles or beliefs. For example, if integrity or creativity are important to me, I evaluate how different pursuits align with these principles.

To ensure that my decision is right, I evaluate the practical outcomes of my decision. If a decision leads to positive, tangible results, it reassures me that I am on the right path.

2) What is your present vision for happy and prosperous life?

My present vision for a happy and prosperous life is:

1. **Emotional Wellbeing** by embracing who I am and cultivating a positive self-image. Nurturing supportive and respectful relationships with friends and family.
2. **Physical Health** and a healthy lifestyle by regular exercise, balanced nutrition and adequate rest.
3. **Embracing lifelong learning** through books, courses and experiences. Staying curious and open to new ideas and perspectives.
4. **Having clear and achievable goals** that align with my values. Giving back to the community and helping others. Living in a way that respects and preserves the environment.
5. **Managing finances wisely** to ensure security and independence.

3) Take your list of aspirations and concerns and find out how much time and effort you put in everyday in the following three areas:

- **Right understanding (clarity)**
- **Relationship (right feeling)**
- **Physical facility.**

Right Understanding

- **Aspirations:** Seeking knowledge, self-awareness, creativity
- **Activities:** Reading books, attending workshops and tutorials, self-reflection, working on new projects.
- **Time and effort:** High concentration, note-taking, and reflection on content. Time: 2-5 hours daily.

Relationships

- **Aspirations:** Building meaningful connection, nurturing relationships and effective communication.
- **Activities:** Spending quality time with family by engaged listening, emotional support, meaningful communication with friends through meaningful conversations. There is no measurement of time in these activities as these activities are focused on quality and meaningfulness.

Physical Facilities

- **Aspirations:** Maintaining health, ensuring comfort and safety, travelling.
- **Activities:** Regular exercise, cooking healthy meals, gain financial stability.
- **Time & effort:** Exercise → 30 min - 1 hour, Home maintenance → 30 minutes (for cleaning, repairs)

What is peer pressure? Have you felt it during day-to-day life? How do you handle it?

Peer pressure is the influence exerted by individuals within the same social group that encourages someone to change their attitudes, values or behaviours. It can manifest in various forms, such as direct requests, subtle hints or implied expectations. It can be both harmful and negative or beneficial and positive.

Peer pressure is a common experience in daily life.

Friends might urge to participate in activities we might not be comfortable with, or classmates may influence decisions regarding academics. Family may exert pressure to follow traditions and life choices, etc.

To handle peer pressure, we need to focus on strategies like self-awareness, clear understanding of values and principles, communication skills, learning to say 'no' in various cases, discussing feelings with trusted friends and family members, considering potential outcomes of activities and gathering information about situation. We should try to surround ourselves with positive influences which who respects our decisions and encourage positive behavior.

Discrimination leads to acrimony in relationship. Explain.

Discrimination breeds acrimony in relationships because it creates an environment of inequality and disrespect. Here's how:

1. **Breaks Trust and Respect:** When someone is discriminated against, it undermines their sense of worth and value. This can lead to feelings of resentment, anger, and distrust towards the discriminator and the system that allows such discrimination.
2. **Creates Distance and Isolation:** Discrimination often isolates individuals or groups, making them feel excluded and unwelcome. This distance can deepen existing rifts and make it difficult to build or maintain healthy relationships.
3. **Generates Resentment and Anger:** The experience of being discriminated against can lead to feelings of anger, resentment, and bitterness. These negative emotions can poison relationships and make it difficult to communicate and cooperate.
4. **Undermines Shared Values:** Discrimination often challenges fundamental values like fairness, equality, and respect. When these values are violated, it can erode the foundation of trust and cooperation that are essential for healthy relationships.
5. **Perpetuates Cycles of Conflict:** Discrimination can create a cycle of conflict and retaliation. When individuals or groups feel marginalized and disrespected, they may resort to counterproductive behaviors, further escalating tensions and damaging relationships.

What are the different values necessary in human to human relationship?

1. Trust
2. Respect
3. Care
4. Reverence
5. Glory
6. Gratitude
7. Love
8. Affection

Trust

- To be assured that each human being inherently wants oneself and the other to be happy & prosperous & known as trust.

Respect

- Right evaluation, it refers to individuality.

Care

- The feeling of care is the feeling to nurture & protect the body of our relation.

Affection

- It is the feeling of being related to the other.

Guidance

- The feeling of ensuring right understands & feeling in the other is called guidance.

Reverence

- The feeling of acceptance of excellence in the other is called reverence.

Glory

- Is the mere feeling for someone that has made effort for excellence, to have the right understanding & feeling.

Gratitude

- The feeling of acceptance for those who have met effort for my excellence is the feeling of gratitude.

Love

- The feeling of being related to all, to every unit in existence, the entire existence into the feeling of love. It is the emotion of strong affection & personal attachment.

“Right understanding in the individual is the basis for harmony in the family, which is the building block for harmony in the society”. Explain.

The harmony in the society begins from the individual. The harmony in the society begins from the individual, so we need to ensure right understanding of harmony in the individual as the foundation of harmony in the society. With right understanding, the need for physical facility can be asserted by assessing our needs correctly & by producing more than required. The family can be prosperous in the individual. Assurance of right understanding in the family & prosperity in the family, understanding of human relationship leads to harmony & must in the society.

What are the 4 orders of Nature?

The four orders of nature are often described as:

1. **Material Order:** This encompasses the physical world - the elements, minerals, water, air, and all living organisms. It's about the raw materials and the physical processes that govern the natural world.
2. **Plant Order:** This order includes all plant life, from single-celled organisms to towering trees. It represents the life force, photosynthesis, and the production of oxygen.
3. **Animal Order:** This includes all animal life, from insects to mammals. It represents movement, instinct, and the diversity of life forms.

4. **Human Order:** This refers to human society, culture, and our relationship with the natural world. It includes our values, beliefs, knowledge, and the technologies we create.

How does the current world view leads to contradiction and dilemma in professional life?

The current world, with its rapid technological advancements, globalization, and increasing complexity, presents several challenges that can lead to contradictions and dilemmas in professional life:

- **Conflicting values:** Individuals may face situations where their personal values clash with the values of their organization or the expectations of their profession. For example, a software engineer might have ethical concerns about the potential misuse of the technology they are developing.
- **Ambiguous ethical situations:** Many professional dilemmas are not straightforward and have no clear-cut answers. Factors like cultural differences, changing technology, and evolving legal frameworks can make it difficult to determine the right course of action.
- **Pressure to prioritize profits over ethics:** In a competitive business environment, there can be pressure to prioritize financial gain over ethical considerations. This can lead to decisions that may harm stakeholders, the environment, or society as a whole.
- **Rapid technological advancements:** New technologies and their applications often raise ethical questions that require careful consideration. For example, the use of artificial intelligence, data privacy, and cyber security all present ethical challenges.
- **Globalization and cultural diversity:** Operating in a globalized world requires navigating different cultural norms and ethical standards. This can create confusion and dilemmas when trying to determine the appropriate course of action.

What do you mean by professional ethics?

Professional ethics refers to the moral principles and values that guide the conduct of individuals in their professional roles. It encompasses the standards of behavior that are expected of professionals in a particular field, such as medicine, law, engineering, or business. These standards often include principles like honesty, integrity, confidentiality, and respect for others.

What do you mean by natural human order?

The concept of natural human order refers to the inherent principles and tendencies that guide human behavior and society. It suggests that there are natural laws and patterns that shape human interactions and social structures

Implications:

- **Harmony and balance:** If human society aligns with its natural order, it could lead to greater harmony and balance within individuals, communities, and the environment.
- **Fulfillment and well-being:** Recognizing and respecting the natural tendencies and needs of human beings could lead to greater individual and collective well-being.

- **Sustainable living:** Understanding the natural limits and carrying capacity of the planet could guide us towards more sustainable and environmentally responsible ways of living.
- **Equitable societies:** A society that is aligned with the natural human order might be more just and equitable, as it would value the inherent worth and dignity of all individuals.

What is ethical human conduct? Explain in terms of values and characters with examples.

Ethical human conduct refers to the way individuals behave and make decisions based on a set of moral principles and values. It's about acting in a way that is considered right, just, and fair, taking into account the impact of one's actions on oneself, others, and the environment.

Here's a breakdown in terms of values and characters:

Values:

- **Honesty:** Being truthful and sincere in all interactions.
- **Integrity:** Acting with consistency and upholding moral principles even when faced with challenges or temptations.
- **Respect:** Valuing and treating others with dignity and consideration, regardless of their background, beliefs, or status.
- **Compassion:** Showing empathy and concern for the well-being of others.
- **Responsibility:** Taking ownership of one's actions and their consequences.
- **Justice:** Striving for fairness and equality in all interactions.
- **Fairness:** Treating everyone impartially and without bias.
- **Courage:** Having the strength to stand up for what is right, even when it is difficult.
- **Humility:** Recognizing one's limitations and being open to learning and growth.
